

ALINA 2.0 — User Guide

Alina 2.0 is a pixel-art page that covers for Alina (DILC) while she is on leave. It shows what she finished and what is still open, answers questions from her notes, and hides quite a few things to click. Four speech bubbles under the desk open the views: **What's done**, **What's left**, **Ask a question** and **Water cooler**.

► Click around the desk

1 Cactus sign

Switches the whole page between Russian and English.

2 Curls

Alina hops up behind the monitor: "I'm on leave!", "Back on 28.09", "This is a hologram"...

3 Coffee

"Need more coffee". With sound on, a voice says it out loud.

4 Cat

Wakes up and purrs. In English it meows in Spanish: "¡Miau!", "Dame tacos".

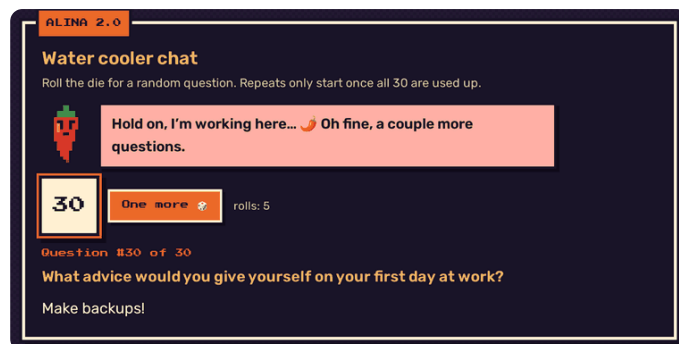

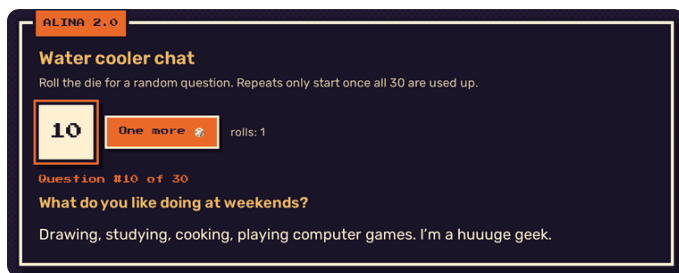

► Two languages

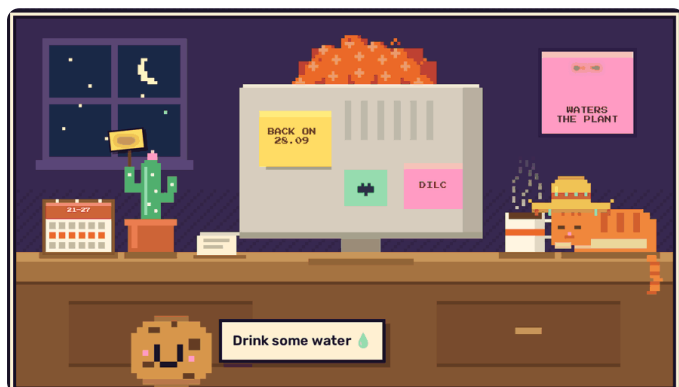

One click on the cactus sign switches everything: buttons, task lists, notes on the desk and Claude's answers. The browser remembers your choice.

► Water cooler

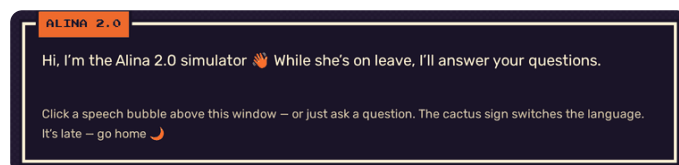

Roll the die for one of 30 questions about Alina – from coffee to crows to Klingon. Nothing repeats until all 30 are used. Roll a fifth time and a chili pepper protests: "Hold on, I'm working here..."

► Little extras

The cookie: 10 minutes after you open the page, then every 40 minutes. Or click the cookie button at the bottom right.

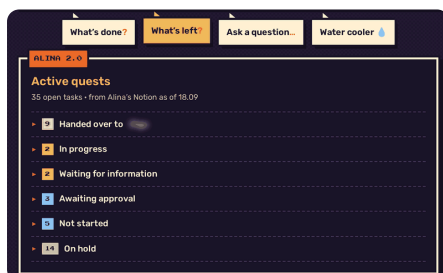

After 18:00 the greeting sends you home.

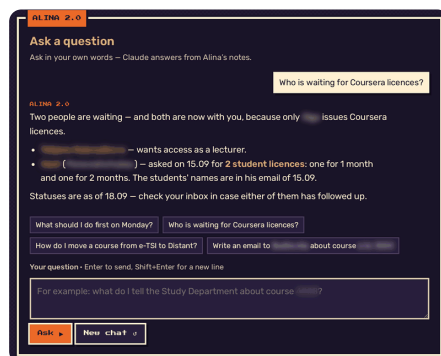

1 leave dates • 2 sound: typing clicks, purring, the coffee voice • 3 cookie on/off • 4 pause the animation

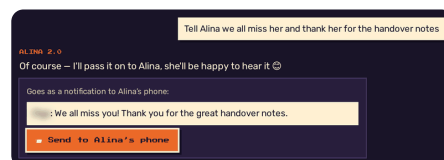

► The work part

What's done / What's left. 22 finished and 35 open tasks. Start with **Handed over**; leave **On hold** until Alina is back. Course numbers open Moodle.

Ask a question. Type or click a suggestion, press Enter. Answers come only from Alina's notes, never with real passwords. It can draft emails in RU, LV or EN. (Example answer.)

Message to Alina. Ask it to pass something on, check the text on the card, click **Send to Alina's phone**. Nothing is sent before you click.

Ask a question needs the work Claude account. If you see a red sign-in message, click **Sign in to Claude** at the bottom right, then reload the page. All data is as of 18.09.2026.
