

DILC Robot

Field manual for the DILC team. What every tab does, how the robot thinks, and the small tricks that save clicks. October 2026.

Looks around

Blinks

Thinks

The office at the top of the page is alive: the robot looks around, blinks and drops question marks, its antenna light flashes, a sheet of paper drifts past the window, steam rises from the mug and the printer keeps feeding a report across the floor. If reduced motion is on in your system, the scene stands still.

How the robot works

House rules the robot follows

- Answers only from its own sources and says who recorded a fact and when.
- Keeps answers to a few lines unless you ask for detail.
- Never sends mail. Drafts wait for you.
- Says plainly when it has no data instead of guessing.
- Knows courses by number, not title: many courses share a name.
- Doesn't know passwords or enrolment keys; it tells you where they are kept.

Getting in

- Open the robot link in Claude with your work account and click **Sign in**. Without it you can read and ask, but not change anything.
- The sign-in labels are in Russian: **Логин** = login, **Пароль** = password. It's a light in-page lock, so never reuse work passwords.
- **RU** / **EN** switches the language.

Little tricks

-  shows the password, and a hint pops up if you type it in Cyrillic by mistake.
- The language you pick is remembered in this browser.
- Everything has a number: DILC-101 is a task, REC, EV, MAIL and ELM are records, events, letters and elements. E3913 is e.tsi course 3913; D is distant, A is e-adm.

Sign in to the DILC robot

Логин

Пароль

.....

This is a light in-page lock, not a corporate login: do not reuse work passwords.

OK **x**

POBOT DILC RU **Sign out**

Ask Remember Check the mail Tasks Courses People

Elements Calendar Edit and delete Statistics PPTX report

Ask

- Type a question or tap a suggestion. **Enter** sends, **Shift+Enter** adds a line.
- When the records may be out of date the robot offers **Check online**; when Moodle work is needed, **Give it to the robot**. The helper answers in the same card; confirm with **Confirmed – go ahead** if asked.

Little tricks

- The waiting card counts the minutes in the queue and tells you when to expect the answer.
- If the helper has been silent for 30+ minutes in working hours, the card warns you.
- The  button on any task opens Ask with that task already described.

Ask the robot

Answers from DILC records, the wiki and whatever you told it. It always says when a record was made and by whom.

What is the status of the Higher Mathematics course?

DILC

Higher Mathematics – AI-Augmented (e.tsi 3913)

- **Status:** waiting for information – task DILC-101, recorded by [redacted] on 24.09.2026.
- **Next step:** import the question bank once [redacted] sends it.
- **Due:** 30.09.2026 – already overdue.

The records don't show whether the bank has reached Moodle since then.

open e.tsi 3913 and check whether the Higher Math question bank has been imported

The helper works through the queue every 10 minutes • queued 0 min ago • answer expected within 10 min

Cancel request

Remember

- Write a fact the way you'd say it, for example "gave a consultation about the gradebook in e.tsi 3870", and click **Parse**.
- The robot fills in type, status, course, person, topic and date. Fix anything, then **Save**. Saved facts feed Ask, Statistics and the PPTX report.

Little tricks

- Paste a whole Moodle link: the course number is taken from it.
- Name a course without its number and the robot offers the likely courses as buttons.

Remember

Write it as you would say it: "started the AI course Microeconomics", "gave [redacted] a consultation about Moodle", "Makroekonomika is on hold". The robot parses it and shows what it will store.

Save your Memory: a consultation about the gradebook in e.tsi 3870 today

Parse

Type	Status	Course / subject	Who / for whom
Consultation	—	Gradebook categories	Save Memory
Topic	Date	Course link or id	
gradebook	01/10/2026	 https://e.tsi.lv/course/view	
Note	Save your Memory: a consultation about the gradebook in e.tsi 3870 today		

Save **Cancel**

Check the mail

- Twice a day the helper reads the Outlook inbox and lays out each letter: what the robot can do, what needs a person, and a draft reply.
- Copy** the draft and send it from Outlook.
Mark as handled when done.

Little tricks

- Erase** clears a letter from the robot only; it stays in Outlook.
- Check the mail now** orders an extra pass, ready in about 10 minutes.

Mail: what can be done

The robot reads the Outlook inbox twice a day (08:27 and 14:27) and sorts it: what it can do itself and what needs a person. It never sends the drafts.

Check the mail now Erase handled

Last pass: 01/10/26, 10:50 • pass 01:10 10:50: 3 facts recorded from 6 letters (newsletter skipped)

MAIL-001 **Request** new **Add a lecturer to Macroeconomics** Mark as handled Erase

- 01/10/2026

Hello! Please add [redacted] as a teacher to the Macroeconomics course for groups 4101BEA and 4102BEA. Thank you!

I can do it:

- Enrol [redacted] as Teacher in e.tsi 3870
- Check that groups 4101BEA and 4102BEA are enrolled

Needs a person:

- Confirm with the dean that [redacted] is approved to teach the course

Draft reply:

Hello [redacted], thank you! I will add [redacted] to the course as soon as the dean confirms. Best regards, [redacted]

Copy

Tasks

- List** or **Board**. Filter by me, open only, project, assignee, requester, status, due date or text; **× Clear filters** resets.
- New task** takes a title, status, project, assignee, due date, requester, course and next step.
- Tick rows to move, re-status or delete several at once.

Little tricks

- An orange dot means the task arrived on its own (mail, Notion, the helper). **To sort out** lists them.
- Overdue tasks turn red. Click a status dot on a board card to filter by it.
- When a colleague saves, the page waits until you finish typing, so your text is never wiped.

Tasks and projects

The DILC board: Notion-style statuses, next step, due date and owner. Due dates also show up in the calendar.

View: **Board** **List** New task

NO.	TASK	STATUS	ASSIGNEE	DUE
☐ DILC-104	Add "About the instructor" block to Interna...	In progress	[redacted]	02/10/2026
☐ DILC-106	Moodle for new teachers – check who enrol...	In progress	[redacted]	05/10/2026
☐ DILC-101	Higher Mathematics – import the question ...	Waiting for info	[redacted]	30/09/2026!
☐ DILC-108	Coursera licences for two students	Waiting for info	[redacted]	06/10/2026

Task card

- Click a row to open the card. Change the status from the header pill; edit the title and text in place, they save when you click away.
- Chips set the due date, assignee, requester and project.  opens comments, **+ link a task...** ties related work together,  edits or deletes.

Little tricks

- Click the orange dot by the status once you've checked an automatic task.
- Two people saving at the same second still get different DILC numbers.

Add "About the instructor" block to International Business

D1980 **change course** ☐ Task without a course

02/10/2026 **Technical course support** **▼**

Photo received – write a short bio and paste the block

COMMENTS - 2

Alma Willemse 30/09/26, 10:12
[redacted] sent the photo this morning, bio still missing.

Alma Willemse 30/09/26, 15:40
I asked her for 3–4 sentences in English. If nothing comes by Friday, draft it from her CV.

Courses and people

- **Courses** holds the DILC catalogue plus every course mentioned in tasks and records. Filter by type and by site; a row opens the course card with its links, tasks and records.
- **People** lists everyone who asks for or does the work, by family name. Click a name to see what they requested.

Little tricks

- Course names match across Russian, Latvian and English, with or without diacritics: Zaiā Logistika is Zala Logistika.
- Names match with first and last name swapped.
- Course numbers in tasks, comments and answers are clickable.

Calendar

- Month or week view, filtered by kind or person. Open tasks with a due date appear on their own.
- Upcoming items sit under the grid with **Done**, **Edit** and **Delete**.

Little tricks

- Double-click a day to start a task on it.
- The robot's own date picker: weeks start on Monday, weekends are red, today is outlined.

DILC calendar

Statistics, edit and delete

- Pick a period and read the counters, monthly chart, split by type, task statuses and frequent request topics.
- Edit and delete** lists the latest records to fix or remove; every change lands in the log.

Little tricks

- The counters are buttons: click one to see the records or tasks behind the number.
- Build a report** writes a short summary of the period, ready to copy.

PPTX report

- Pick the period (last month by default), click **Show facts** and untick what stays out.
- Write next month's focus, one line per block as *Heading – description*, or click **Fill from open tasks**.
- Build PPTX** downloads the deck.

Little tricks

- The deck is built right in your browser, in the style of the DILC monthly report.
- Each person gets their own activity slides, six rows per slide, plus a title and a focus slide.

Admin

- Admins open it from the **Admin** tab or the ⚙ at the bottom of the page.
- See when the helper last ran, export all records, manage users and passwords, and read the log of every action.

Little tricks

- Removing a user or changing their role reaches their open session straight away.
- Failed sign-ins show up in the log too.

Screenshots show sample data; names are blurred.
